

## **CHAPTER 4: PLANNING AREA RECOMMENDATIONS**

The 2016 Genoa Township Comprehensive Plan is the sum of all its chapters and maps. The Plan divides the Township into six planning areas. Boundaries for these planning areas were previously established in the 2008 Comprehensive Plan and took into consideration existing community character, sewer availability, infrastructure, topography, soils, and watersheds, the latter being an area in which all water within naturally flows and drains into one, larger common body of water. Watershed boundaries are typically divided by naturally occurring topographic features such as ridge lines. Specific land use recommendations for each of the sub-planning areas are detailed in the text below and further illustrated on the Comprehensive Land Use Plan map (page 69). These recommendations are not made to necessarily encourage existing land uses to change but, instead, to recommend potential alternative land uses.

### **I. Planning Area 1**

This planning area is generally bounded by Orange Township to the west, Westerville City Limits to the south, Sunbury Road to the east, and Big Walnut Road to the north. Additionally, there are two small, separate areas consisting of several parcels that are part of Genoa Township and within this planning area but are surrounded by the City of Westerville. These “islands” are a result of annexations which have occurred over the past few decades. One of these areas is located south of Polaris Parkway, west of North State Street (State Route 3) and includes parcels on Ruckmoor Drive, Gerwig Court, Garrett Court, and Spruce Lane, while the other is located south of County Line Road, west of North State Street (State Route 3), and includes several parcels along Moss Road. All of Planning Area 1 lies within the Delaware County Regional Sewer District Service Area and is served by Del-Co Water Company. This area is mostly built out.

There are a two unique uses in Planning Area 1 that are worth noting:

1. The WOSU radio communications tower, which is owned and operated by The Ohio State University, is located on the northern side of Highland Lakes Avenue near State Route 3. The tower covers two parcels totaling 45 acres.
2. A retired landfill located on an 18 acre property on the east side of Worthington Road, just south of Meadowood Condos. This land is not suitable for buildings but may be appropriate for passive open space or recreational fields.

### **The Plan recommends:**

- Without sanitary sewer, single-family residential uses on lots of 20,000 square feet (approximately 0.45 acres) or greater.
- With sanitary sewer, residential development in an approved Planned Residential Development (PRD).
- Permitting neighborhood-scale commercial/office uses on parcels already zoned commercial.

**CHAPTER 4: PLANNING AREA RECOMMENDATIONS****II. Planning Area 2**

This planning area is generally bounded by Smothers Road and Blendon Township (Franklin County) to the south, Harlem Township and Red Bank Road to the east, Red Bank Road to the north, and Sunbury Road to the west. The boundary of this planning area also extends west from Red Bank Road across Hoover Reservoir to divide it from Planning Area 3. Planning Area 2 may eventually be provided sewer service by Delaware County as part of the Lower Big Walnut Sewer Area via an agreement with the City of Columbus, as described previously in Chapter 3. Centralized water is provided by Del-Co Water Company. This planning area lies in the watershed to Hoover Reservoir, which is the water supply for the City of Columbus. The Hoover Reservoir watershed should continue to be protected from excessive development by retaining low densities to help protect surface water quality.

**The Plan recommends:**

- Without sanitary sewer, single-family residential uses on lots of two (2) acres (0.5 dwelling units per gross acre) or greater.
- Permitting neighborhood-scale commercial/office uses on parcels already zoned commercial.

**III. Planning Area 3**

This planning area is generally bounded by Red Bank Road to the south, Sunbury Road to the west, Berkshire Township to the north, and Harlem Township to the east. The boundaries of this planning area also extend west from Red Bank Road across Hoover Reservoir to divide it from Planning Areas 2, and north from Sunbury Road to the Township's border, approximately at the center of Hoover Reservoir, to divide it from Planning Area 4. Planning Area 3 may eventually be provided sewer service by Delaware County as part of the Lower Big Walnut Sewer Area via an agreement with the City of Columbus, as described previously in Chapter 3. Centralized water is provided by Del-Co Water Company. This planning area lies in the watershed to Hoover Reservoir, which is the water supply for the City of Columbus. The Hoover Reservoir watershed should continue to be protected from excessive development by retaining low densities to help protect surface water quality.

**The Plan recommends:**

- Without sanitary sewer, single-family residential uses on lots of two acres (0.5 dwelling units per gross acre) or greater.
- Permitting neighborhood-scale commercial/office uses on parcels already zoned commercial.

**IV. Planning Area 4**

This planning area is generally bounded by Big Walnut Road and Sunbury Road to the south, Hoover Reservoir to the east, Berkshire Township and Plumb Road to the north, and the Hoover Watershed boundary to the west. The ridge line which forms the eastern boundary of the Hoover Reservoir watershed in Planning Area 5 approximately follows State Route 3 from its intersection with Big Walnut Road north/northwest to the intersection of Worthington/Lewis Center roads and then continues northward along the Rome Corners Road corridor into Berkshire Township. The boundaries of Planning Area 4 also extend north from Sunbury Road to

**CHAPTER 4: PLANNING AREA RECOMMENDATIONS**

the Township's border approximately at the center of Hoover Reservoir to divide it from Planning Area 3.

This area is served by Del-Co Water and the Delaware County Regional Sewer District. Portions of Planning Area 4 are served by sanitary sewer that has been extended and funded by developers for use in existing PRDs. The environmentally sensitive nature of Planning Area 4, due to its proximity to Hoover Reservoir, makes development in this area particularly dependent on the availability of centralized sanitary service.

**The Plan recommends:**

- Without sanitary sewer service, single-family residential uses on lots of two acres (0.5 dwelling units per gross acre) or greater.
- Permitting neighborhood-scale commercial/office uses on parcels already zoned commercial.

**V. Planning Area 5**

This planning area is generally bounded by Big Walnut Road to the south, Orange Township to the west, Berkshire Township to the north, and the Hoover Reservoir watershed boundary to the east. This area is served by Delaware County Regional Sewer District and Del-Co Water. The southern part of Planning Area 5 is now largely developed (or slated for development) as Planned Residential Developments (PRDs), some utilizing Conservation Development Standards preserving 50 percent, of open space. Remaining northern areas retain large old growth woodlands serving as a backdrop to large, single-family parcels. Unique topography and ravines shall be preserved as open space in future developments whenever possible.

**The Plan recommends:**

- Without sanitary sewer service, single-family residential uses on lots of two acres (0.5 dwelling units per gross acre) or greater.
- Permitting neighborhood-scale commercial/office uses on parcels already zoned commercial.

**VI. Planning Area 6**

This planning area is generally bounded by the City of Westerville limits to the south, the Northern Lakes development to the east, the Orchard Lakes and Highland Lakes East developments to the north, and the Highland Lakes East development and City of Westerville limits to the west. This area is served by Delaware County Regional Sewer District and Del-Co Water. Planning Area 6 is currently zoned Planned Commercial and Office District (PCD), Light Industrial (LI), or Planned Industrial-Warehouse (PID). No changes are proposed to existing zoning, with the exception of two residential lots along Maxtown Road.

**The Plan recommends:**

- Commercial-Office (planned), Neighborhood-Scale Commercial (planned), and/or Industrial (planned) land uses.
- Two residential lots along Maxtown Road (6463 Maxtown Road and the adjacent lot to the east) may be considered for Commercial-Office (planned) or Neighborhood-Scale Commercial (planned) use provided they include significant visual screening and noise barriers for the

**CHAPTER 4: PLANNING AREA RECOMMENDATIONS**

single-family homes to the north. The City of Westerville maintains and controls this portion of Maxtown Road and, consequently, has final say over driveway locations for these properties.

## **CHAPTER 5: IMPLEMENTATION**

A number of approaches have been chosen to make Genoa Township's vision a reality. Taking a strategic approach helps focus the Township's efforts in the right direction early in the implementation process and incorporates what is truly unique about the Township. When followed, these strategies are designed to bring the plan's recommendations to life in a timely manner. This chapter provides a list of implementation strategies organized within specific categories.

### **I. Retain the Qualities of Genoa Township that are Desirable to Residents**

#### **A. Inventory and Protect Critical Resources by Utilizing Geographic Information System**

Not all of Genoa Township is suitable for development. Delaware County's Geographic Information System (GIS) provides assistance in identifying those areas that may not be suitable for development regardless of whether the area is inside or outside the present sewer service area. GIS can also identify those areas that are critical in preserving the Township's overall rural image. This includes, but is not limited to; bodies of water, wetlands, ravines, archeological resources, steep slope areas, wooded lots, and flood-prone sites.

#### **B. Encourage Further Protection of the Watersheds**

The Genoa Township Board of Trustees should consider exploring future measures with conservation groups to develop and implement watershed protection plans and policies. While Hoover Nature Preserve and U.S. Army Corps lands provide natural protection, additional actions in watersheds can help to further protect their natural qualities.

#### **C. Emphasize More Creative Design through Conservation Development**

Encourage the use of the "Conservation Development Standards" in the Planned Residential District (PRD) and the Planned Rural Residential Conservation District (PRRCD). Such a creative approach will allow development of more building lots while retaining protected natural areas in keeping with the Township's vision. This approach is not recommended east of the Hoover Reservoir.

#### **D. Promote Publicly-Owned and Networked Green Space**

As developments are planned, consideration by Genoa Township should be given to the ownership of green space. Developers may donate lands to Genoa Township or grant them to homeowner associations, or other entities approved by the Board of Trustees, that would ensure public use and protection of such lands. As development occurs, consideration should be given to how green space areas can be publicly linked with bike paths and/or pedestrian pathways.

#### **E. Utilize Conservation Easements to Preserve Native Landscape**

The cost of acquiring property for natural or cultural resource conservation is often possible only at a considerable expense. Other alternatives contain inherent legal risks such as the taking of property for public purpose. In the case where a homeowners' association is not in place, an

open space set aside or conservation easement may be more appropriate than fee simple acquisition. As an agreement between property owners and the holder of the easement (governing treatment of the property by current and future owners), the conservation easement allows the property owner to continue owning and using in perpetuity a property while assuring its protection from development and the preservation of critical resources.

The Delaware Soil and Water Conservation District established a conservation easement program that allows them to accept such easements that may also need to be maintained for drainage purposes. This program is encouraged to be utilized, if desirable. This program allows for ownership of the easement by a party that not just ensures its protection through the Delaware County Prosecutor's Office, but also has staff to address the maintenance of such easements.

**F. Protect 100-year Floodplains from Filling and Encroachment**

Delaware County's Code Compliance Office acts as the Floodplain Coordinator for the County. While they already limit certain construction within the floodplain, the Township should consider working with them to strengthen these restrictions. In accordance with the previous recommendation, conservation easements can be placed over such lands and used to preserve both the floodplain, adjacent wooded areas, or areas in need of preservation that protect the vitality of the floodplain and its purpose as a flood control area. Additional easements may also help to preserve wildlife and critical resources.

**G. Utilize Farmland Preservation Easements**

Landowners who want to protect their land in agricultural use should consider donating an easement over their land to the Ohio Department of Agriculture. There are many federal tax advantages associated with the donation of an easement and the easement assures the land is not developed in the future. These donations are evaluated by the Ohio Department of Agriculture prior to acceptance to ensure that such lands are suitable for long-term agricultural use.

**II. Guide Development in Such a Way to Maintain and Advance the Local Quality-of-Life**

**A. Limit Type of Commercial/Office and Industrial Uses to Neighborhood-Scale, Professional & Personal Service.** Commercial and office uses within Genoa Township should meet the convenience needs of Township residents, be neighborhood-oriented and pedestrian-friendly, and be limited to areas currently zoned or grandfathered for such use. Included in the review process for neighborhood-scale uses should be criteria related to building footprint as well as special consideration given to: hours of operation, noise generation, use, lighting, and pedestrian/bike access.

**B. Uphold Compliance with the Comprehensive Plan**

When an application proposes an amendment to the Zoning Map, a review for consistency with the recommendations of the Comprehensive Plan shall be performed. If the proposed amendment is in conflict with the Comprehensive Plan, the applicant shall address the conflict(s) by:

1. Identifying any changed circumstances since the Plan was adopted; and
2. Providing a rationale that supports the conflicting elements of the proposed amendment.

When an application proposes amendment of the Zoning Resolution, a review for consistency with the recommendations of the Comprehensive Plan shall be performed and the results of such recommendation shall be included in any action by the Zoning Commission and set forth in its recommendation to the Genoa Township Board of Trustees.

### **III. Recommend Reuse or Reinvestment in Lands with Such Potential**

#### **A. Develop Incentives for Residents and Businesses to Maintain their Property**

The Board of Trustees may work with the Delaware County Commissioners to form a Community Revitalization Area (CRA) by application to the Ohio Department of Development that could help older qualified neighborhoods by offering property owners tax abatements for making certain improvements to their property. This will help justify regular maintenance, and encourage development.

### **IV. Future Revisions to the Zoning Resolution and Updates to the Comprehensive Plan**

#### **A. Zoning Resolution**

After adoption of the Comprehensive Plan, the Zoning Commission or the Trustees will review appropriate revisions to the Zoning Resolution. Actions recommended by this plan are as follows:

1. Perform a comprehensive legal review of the Zoning Resolution and address any inconsistencies or unnecessary redundancies found within the document.
2. Evaluate whether or not all straight zoned commercial properties and/or industrial properties, which are properties located within zoning districts that do not require final development plans be approved by the Zoning Commission and Board of Trustees, can and should be re-zoned into planned districts, which would require final development plan approval, instead.
3. Perform a general review of the definitions in Article 4, especially use classification and use-related definitions (such as, but not limited to, industrial and light industrial), and add, revise, and/or reclassify definitions as needed.
4. Incorporate tables which clearly indicate which uses are; permitted, conditional, or prohibited in each zoning district.
5. Update agricultural regulations to ensure consistency with the Ohio Revised Code and case law, especially in regards to agritourism.
6. Establish standards for Neighborhood-Scale Commercial developments, such as; hours of

operation, tenant size, maximum permitted square footage, permitted uses, and drive-thru regulations.

7. Review open space requirements and/or add perimeter buffering requirements for developments.
8. Delete on-street parking restrictions and any other currently regulated items that cannot be enforced under the Zoning Resolution.
9. Review the Planned Rural Residential Conservation District (PRRCD) and the Lower-Density Planned Residential District (PRD-V).
10. Review Article 17, Special and Miscellaneous Uses, to clearly distinguish Conditional Uses and their standards from uses not requiring Conditional Use approval.
11. Review Article 18, Sign Standards, to ensure it is content neutral and complies with the United States' Supreme Court decision in *Reed v. Town of Gilbert, Arizona*.
12. Evaluate minimum parking space requirements in Article 19 to ensure developments are not being required to provide more parking spaces than are really needed.
13. Distinguish between, and provide separate processes for, legislative zoning acts, such as map and text amendments, and administrative zoning acts, such as approval of final development plans and final development plan amendments.
14. Resolve the dual zoning situation of certain properties located along Freeman Road.
15. Review, and update as needed, the intents and purpose sections of each article to ensure that they adequately describe and legally justify why regulations within said article exist.
16. Standardize the formatting of each zoning district article so that they are consistent with one another.

#### **B. Comprehensive Plan**

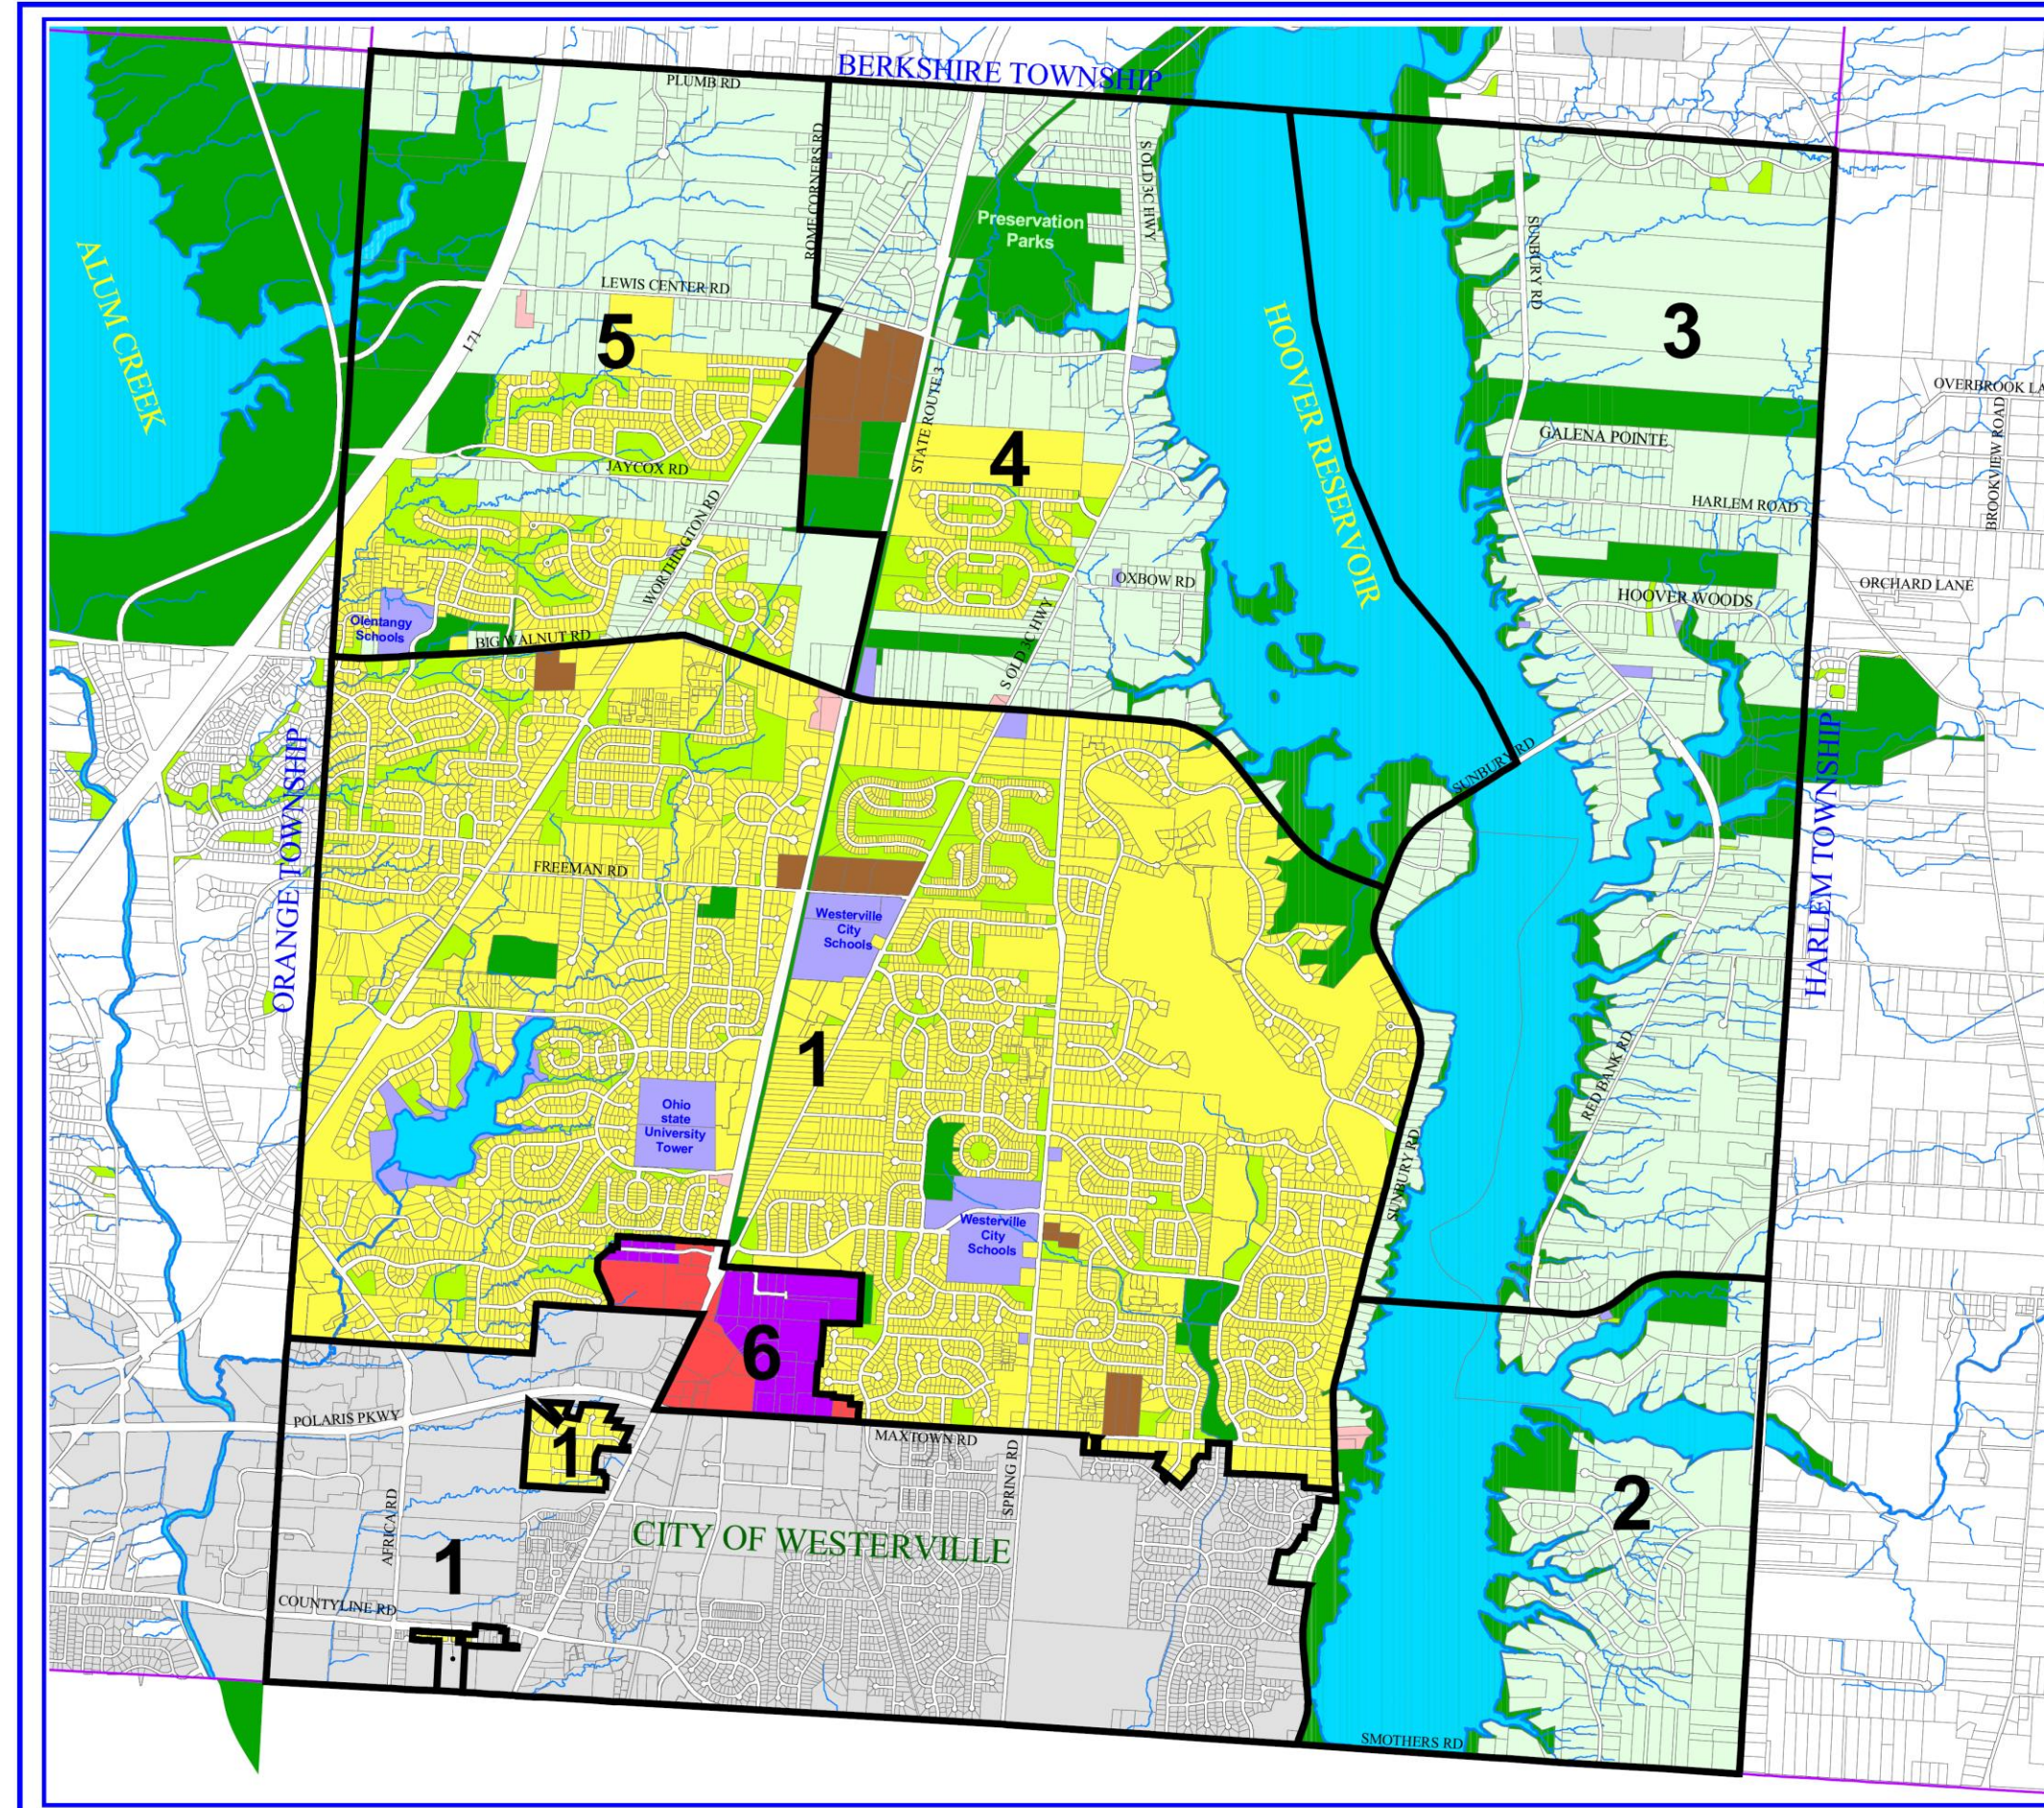

The Comprehensive Plan shall be reviewed at a minimum, once every five years, to determine if changes are warranted. If issues are specific to one Planning Area, it may be desirable to initiate a planning process that would create an addendum to this document outlining changed or additional recommendations for a specific area.

# Genoa Township

## Comprehensive Land Use Plan 2016

Delaware County, Ohio

Adopted December 1, 2016

- Development Plan Sub-Areas
- Township Boundary
- Road Right of Way
- Property Lines
- Rivers/Lakes
- Streams
- Recommended Future Land Use**
  - Neighborhood-Scale Commercial (Planned)
  - Commercial-Office (Planned)
  - Industrial (Planned)
  - Community Facility (Planned)
  - Public-Institutional
  - Parks and Recreation
  - Open Space
  - Residential at 0.5 dwelling units per acre (2+ acre lots)
  - Residential or Planned Residential

Prepared By: Delaware County Regional Planning Commission (740) 833-2260
